<u>TO WHOM IT MAY CONCERN</u>

I am happy to write a recommendation for Shivani Mayekar, who has worked with Omdena from September, 2021 to November, 2021.

While in Omdena, Shivani Mayekar participated in the following Omdena Challenge:

- Internet Jurisdiction - Leverage AI to crowdsource the mapping of the Datasphere

In the above project, Shivani Mayekar was an active collaborator, and thanks to her experience in Machine Learning, she was able to contribute immensely to the project. Shivani Mayekar was also a reliable contributor who always submitted tasks on time and was a team player with good communication skills who collaborated with other Engineers from all around the world.

We had the pleasure of working with Shivani Mayekar, and I am confident in recommending her for future endeavors that allow fulfilling her dreams. I am very sure Shivani Mayekar will make a great impact and be a valuable asset wherever she works.

If you have any further questions about Shivani Mayekar, feel free to reach Omdena Project Team at project@omdena.com.

Best regards,
